

AP automation that builds your AI foundation.

Intent-based document AI. Built for business. Designed to compound.

WHY PRIOR AUTOMATION FALLS SHORT

Manual works. OCR works. RPA works. None of them solve it completely.

MANUAL

WHAT IT DOES

Humans key every field from every invoice.

WHERE IT BREAKS

Slow. Error-prone at 1-4%.
Capacity-limited.
Cost scales linearly with volume.

OCR + RPA

WHAT IT DOES

Templates and bots automate the top 5 to 20 vendor formats.

WHERE IT BREAKS

Long-tail vendors stay manual.
Format changes route through IT.
Brittle on exceptions.

EXLIFY

WHAT IT DOES

AI reads any document. No templates. Configured in plain English.

WHY THIS WORKS

Intent-based, not rules-based.
Owned by business, not IT.
Validated at the source.

THE NUMBERS

Minutes

to resolve an exception
not days on a desk

In a day

new vendor onboarded
by AP, not IT

1000s

of hours saved per year
redirected to higher-value work

90%

fewer keying errors
validated at entry

Months

to payback
not years

BEYOND AP

One platform. Document-heavy workflows across the business.

Contract Management

MSAs, NDAs, SOWs

Order Management

POs, sales orders

Customer Onboarding

Credit apps, KYC

HR Document Processing

Resumes, I-9s, expense reports

Claims & Reimbursements

Insurance, warranty

Compliance & Audit

Regulatory filings

WHAT MAKES IT DIFFERENT

1 platform, 3 tools collapsed

Form Designer, AI Extraction, Workflow Orchestration. Replaces stacks like Typeform + Hyperscience + Zapier.

Enterprise security by default

SOC 2 compliant, HIPAA-ready, end-to-end encryption, role-based access, full audit trails.

Built for business analysts

Drag-and-drop, no code, plain English configuration. Most users deploy their first automation in under an hour.

INDUSTRIES SERVED

Retail & E-commerce • MFG • Distribution • Healthcare & Life Sciences • Supply Chain & Logistics • Financial Services • More

See it in action!

Send us your hardest 15 invoices. We will demo Exlify on your actual documents.
