

20 Years of Value Innovation, and What Comes Next

This year marks two decades of Doyensys helping Oracle customers modernize with confidence. To mark it, we are launching the Doyensys Executive Intelligence Report: a periodic briefing built for executives and IT leaders who want the signal without the noise.

Each issue will cover what is new at Doyensys, one feature story worth your attention, how our services are organized, and the proprietary IP behind our delivery. We plan to publish quarterly. Feedback on this first issue is welcome.

DOYENSYS VALUE INNOVATION

EXECUTIVE INTELLIGENCE REPORT • AUGUST 2026

MESSAGE FROM THE CEO'S OFFICE

Dear Customers, Partners, and Friends,

First and foremost, thank you. For the past twenty years, we have been privileged to serve remarkable organizations across industries. We are truly grateful for the trust you have placed in us, and we thank every customer, partner, employee, and well-wisher who has been part of this incredible journey.

As we celebrate **20 Years of Value Innovation**, we are delighted to introduce the Doyensys Executive Intelligence Report, a quarterly publication created specifically for business and technology leaders.

Technology is evolving faster than ever before. Artificial Intelligence is transforming enterprises, cloud adoption continues to accelerate, cybersecurity is becoming increasingly critical, and Oracle continues to introduce innovations that reshape the way organizations operate.

Our commitment is simple. We will continue helping our customers modernize with confidence, innovate with purpose, and maximize the value of their technology investments.

Through this newsletter, we want to do more than share company updates. We want to become a trusted source of executive insights, bringing together technology trends, Oracle innovations, AI advancements, customer success stories, and practical guidance that helps organizations prepare for what comes next.

At Doyensys, every engagement begins with a simple belief: **Your success defines our success.**

As we look toward the future, we remain committed to delivering excellence, building lasting partnerships, and helping organizations unlock the full potential of Oracle, Cloud, Data, and Artificial Intelligence. Thank you for allowing us to be part of your journey. We look forward to many more years of innovation together.

Warm Regards,

Somu

Founder & Chief Executive Officer

INSIDE EVERY ISSUE

-  **Executive Technology Insights**
Latest Oracle announcements, product roadmaps, and industry developments.
-  **Artificial Intelligence & Innovation**
Enterprise AI adoption, automation strategies, Agentic AI, and emerging technologies.
-  **Customer Success Stories**
Real-world transformation journeys and measurable business outcomes.
-  **New Services & Solutions**
Latest Doyensys consulting, managed services, cloud, AI, and platform offerings.
-  **Technology Shifts That Matter**
Upcoming Oracle releases, security updates, lifecycle changes, and modernization opportunities.
-  **Expert Recommendations**
Practical guidance from our consultants and architects to help you plan confidently.

“ Our goal is simple: to keep our customers informed, prepared, and ahead of the technology curve.”

01 WHAT'S NEW

Helping Organizations Innovate Faster. Deliver Value Sooner.

Technology is evolving at an unprecedented pace. Organizations are under increasing pressure to modernize applications, embrace Artificial Intelligence, optimize financial planning, close the books faster and report with confidence, and deliver measurable business outcomes while maintaining governance, security, and operational excellence.

To help our customers navigate this transformation with confidence, Doyensys continues to expand its capabilities through strategic investments in AI, Oracle Cloud, and Enterprise Performance Management (EPM).

This quarter, we are excited to introduce two significant enhancements to our service portfolio.

AT A GLANCE

New at Doyensys

AI SERVICES ENABLEMENT

- ✓ AI Strategy
- ✓ AI Agents
- ✓ AI Assisted App Development
- ✓ Managed AI Services

ORACLE EPM ADVISORY & MANAGED SERVICES

- ✓ Advisory
- ✓ Transformation
- ✓ Implementation
- ✓ Managed Services

FEATURED ANNOUNCEMENT

AI Services Enablement

Accelerating Enterprise AI Adoption, from Strategy to Production

Artificial Intelligence has moved beyond experimentation. Today's enterprises require practical AI solutions that integrate seamlessly into existing business processes while ensuring governance, security, and long-term sustainability.

Our newly established AI Services Enablement Team helps organizations confidently transition from AI exploration to enterprise-wide adoption. Rather than delivering isolated proofs of concept, we partner with customers to build scalable AI capabilities that create measurable business value.

CUSTOMER BENEFITS

- Faster Innovation**
Accelerate AI initiatives with proven implementation frameworks.
- Reduced Risk**
Enterprise governance, security, and compliance built into every engagement.
- Faster Time-to-Value**
Deliver business outcomes in weeks, not months.
- Long-Term Partnership**
One trusted partner from strategy through managed services.

WHAT WE DELIVER

- AI Strategy & Readiness Assessment**
- AI-Assisted Application Development**
- Oracle AI & Intelligent Data Platforms**
- AI Agent Development & Enterprise Automation**
- Retrieval-Augmented Generation (RAG) Solutions**
- AI Governance, Security & Responsible AI**
- Managed AI Operations & Continuous Improvement**

" Successful AI adoption is not about deploying another chatbot. It is about creating a trusted enterprise AI foundation that securely connects people, data, applications, and business processes. "

NEW SERVICE EXPANSION

Oracle EPM Advisory & Managed Services

Transforming Financial Planning for Modern Enterprises

Finance organizations are expected to deliver faster insights, improve forecasting accuracy, and support strategic decision-making in an increasingly dynamic business environment.

To address these evolving needs, Doyensys has expanded its Oracle Fusion Cloud practice by introducing comprehensive Oracle Enterprise Performance Management (EPM) Advisory and Managed Services.

Our experienced consultants help organizations modernize planning, budgeting, forecasting, financial close, and reporting through Oracle EPM Cloud.

TRANSFORMATION EXPERTISE

- ✓ Hyperion → Oracle EPM Cloud
- ✓ Excel → Oracle EPM Cloud
- ✓ Hyperion → OCI
- ✓ Any ERP + EPM Cloud

SERVICE PORTFOLIO

- Strategic Advisory**
Business process assessment, roadmap planning, and EPM transformation strategy.
- EPM Transformation**
Planning, Budgeting, Financial Consolidation, Profitability Management, Narrative Reporting, Tax Reporting
- Hyperion Modernization**
Transformation from Hyperion to Oracle EPM Cloud with minimal business disruption.
- Managed Services**
24x7 monitoring, application support, quarterly updates, optimization, and continuous improvement.

WHY IT MATTERS

- ✓ Continuous Planning
- ✓ Driver-Based Forecasting
- ✓ Intelligent Scenario Modeling
- ✓ Faster Financial Close
- ✓ Enterprise Performance Visibility
- ✓ Executive Decision Intelligence

CUSTOMER VALUE

Organizations gain a unified planning platform that enables finance, operations, and executive leadership to make faster, data-driven decisions while reducing manual effort and improving governance.

Ready to Accelerate Your Transformation?

Whether you're exploring Artificial Intelligence, modernizing Oracle applications, or planning your Oracle EPM journey, our experts are ready to help you define the right strategy and deliver measurable business outcomes.

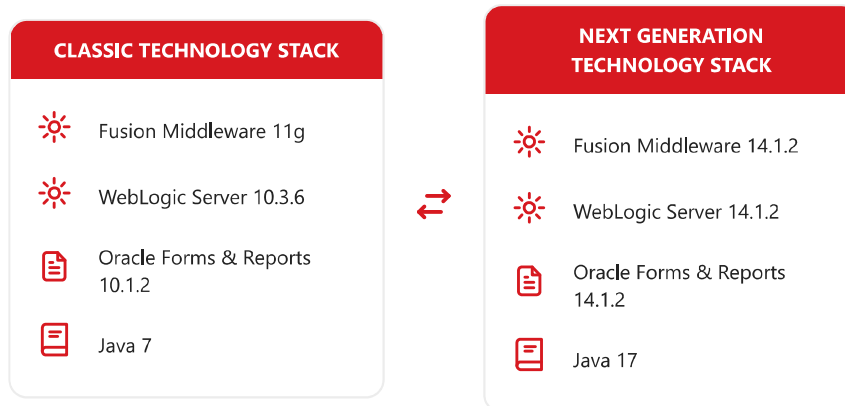

Let's build the future together.

02 FEATURE ARTICLE

Oracle E-Business Suite 12.2: A Major Technology Shift Is Coming

Most EBS 12.2 environments in production today run on the familiar Classic Technology Stack. Oracle's roadmap introduces a Next Generation Technology Stack for EBS 12.2, built on a modern, secure, and future-ready foundation.

"

Oracle has indicated that EBS 12.2 production environments are expected to move to the Next Generation Technology Stack for long-term support. A formal support timeline for the Classic Technology Stack has not yet been announced; Oracle will publish one following general availability of the Next Gen stack.

"

For EBS administrators, architects, and IT leaders, that raises three practical questions:

1 How will the upgrade impact existing environments?

2 What infrastructure changes will be required?

3 How should organizations start preparing today?

WHY IT MATTERS

Supportability

Ensure long-term support and compliance with Oracle's future roadmap.

Security

Leverage the latest security enhancements with modern middleware and Java 17.

Performance

Benefit from improved performance, scalability, and reliability.

Future Readiness

Position your EBS 12.2 environment for future innovations and integrations.

Plan Early. Stay Ahead.

The future of EBS 12.2 is not just about staying current. It is about ensuring long-term supportability, security, and platform readiness before the shift becomes mandatory. Start your assessment and planning today.

MARKET SIGNALS

Why Platform Readiness Matters Beyond EBS

The technology shift above is not happening in isolation. Across the industries we serve, AI adoption is accelerating quickly enough that platform readiness is becoming a competitive question, not just an IT one.

	MANUFACTURING Rootstock's 2026 State of Manufacturing Technology Survey found that 94% of manufacturers now use some form of AI, with platform consolidation and standardizing on fewer application platforms cited as the top ERP priority.	94% of manufacturers use some form of AI
	RETAIL & CPG NVIDIA's 2026 State of AI in Retail and CPG research points to agentic AI scaling fast in these sectors, with retail and CPG among the leaders in moving AI agents from pilot into production for supply chain and store operations.	 AI agents scaling into production
	HEALTHCARE Industry surveys compiled by Presenc AI put healthcare AI adoption at roughly 61% of large enterprises as of early 2026, trailing technology and financial services, largely due to more complex regulatory and data governance requirements.	61% of large enterprises adopt AI
	ENTERPRISE WIDE Presenc AI's compiled 2026 data shows 78% of Global 2000 companies now have at least one AI workload in production, up from 41% in Q1 2024, a signal of how quickly AI has moved from pilot to standard practice.	78% of Global 2000 companies have AI in production

“

The common thread: organizations getting the most from AI are the ones whose core platforms, ERP, EPM, and the applications built around them, are modern enough to support it. An EBS environment running on end of life middleware is a harder foundation to build AI-assisted workflows on top of. That is exactly where our AI and Intelligence pillar, our new AI Services Enablement Team, and this feature article's technology shift intersect.

”

WHAT SHOULD YOU DO NOW?

- 1

Assess

Evaluate your current EBS 12.2 technology stack and dependencies.
- 2

Plan

Define your upgrade path to the Next Generation Stack.
- 3

Prepare

Address infrastructure, skills, and custom application readiness.
- 4

Execute

Perform upgrades with Doyensys proven methodology.
- 5

Optimize

Leverage the new stack to drive innovation and business value.

03 SERVICES ARCHITECTURE

Five Pillars. One Partner.

Our services are organized around five strategic pillars that span our entire Oracle ecosystem, bringing together deep domain expertise, proven methodologies, and industry-leading IP.

End-to-end capabilities. Integrated delivery. Measurable outcomes.
That's the Doyensys difference.

OUR COMMITMENT

Delivering innovation, agility, and value at every layer of your Oracle journey.

1 TRANSFORM WITH

Oracle Fusion Cloud

Helping enterprises modernize and optimize their Oracle Fusion Cloud landscape.

- ✓ Advisory & Roadmap
- ✓ Fusion ERP
- ✓ Fusion Supply Chain Management
- ✓ EBS to Fusion
- ✓ EPM Advisory and Transformation

2 AUGMENT WITH

AI and Intelligence

Embedding AI and intelligence into business processes to drive smarter decisions.

- ✓ AI-Powered Document Intelligence
- ✓ AI-Powered ERP Navigation and User Interface
- ✓ Oracle Fusion AI Studio & Digital Assistants
- ✓ Shopfloor Data & Intelligence
- ✓ Analytics & Data Visualization
- ✓ AI Readiness & Governance

3 SUSTAIN & INNOVATE WITH

Applications and Engineering

Modernizing, extending, and sustaining enterprise applications for long-term success.

- ✓ EBS Sustainability & Modernization
- ✓ AI Enablement for Existing Systems
- ✓ Oracle APEX Development & Custom Applications
- ✓ Workflow & Low Code Modernization
- ✓ Integrations & Extensions

4 BUILD ON CLOUD WITH

Cloud Services

Designing, migrating, and managing secure, scalable, and cost-efficient cloud environments.

- ✓ Cloud Architecture & Strategy
- ✓ OCI Migration & Modernization
- ✓ Database Cloud Services (ADB, DBCS, Exadata Cloud)
- ✓ Cloud Operations & Optimization
- ✓ Security, DR & Compliance

5 OPERATE & OPTIMIZE WITH

Managed Services & SRE

Ensuring performance, reliability, and availability across your Oracle ecosystem.

- ✓ 24x7 Monitoring & Support
- ✓ Database Managed Services
- ✓ Application Managed Services
- ✓ EPM Managed Services
- ✓ SRE & Incident Management
- ✓ Performance Tuning & Capacity Planning
- ✓ Security & Compliance

OUR DIFFERENTIATORS

Oracle Expertise

Deep Oracle domain expertise across applications, cloud, data, and AI.

Proprietary IP

Accelerators and frameworks that drive faster outcomes with lower risk.

Industry Experience

Serving customers across industries with proven solutions and measurable business impact.

Global Delivery

Onshore, offshore, and nearshore teams delivering seamless and scalable services.

Outcome Focused

We align to your business goals and deliver tangible results that drive long-term value.

One Partner. Every Layer of Your Oracle Journey.

From strategy to execution, from cloud to AI, from applications to operations, Doyensys is your trusted partner for transformation, innovation, and growth.

**Stronger Together.
Better Outcomes.
Lasting Impact.**

04 DOYENSYS IP

Our IP, Ready to Deploy

Every engagement draws on a catalog of proprietary accelerators built by Doyensys, purpose built to compress time to value across Fusion, EBS, and cloud environments.

BUILT FOR IMPACT

Our IP solutions are built by practitioners, for practitioners, designed to automate, optimize, and secure your enterprise.

OUR IP ACCELERATORS

Exlify AI

Platform agnostic AI document intelligence for AP, vendor, freight, HR, and field documents.

- ✓ Extracts data with high accuracy
- ✓ Far exceeds OCR and RPA technologies
- ✓ Seamless integration with any ERP or target system
- ✓ Significantly reduce time and effort with Oracle SRs

FEATURED

Fusion Insights

SaaS environment optimizer for Oracle Fusion: right sizing and efficiency.

- ✓ Identify overprovisioned resources
- ✓ Greatly enhance User Experience
- ✓ Actionable insights and recommendations

Cloud FinX

FinOps for Oracle Cloud: cost visibility and governance.

- ✓ Real-time cost visibility
- ✓ Budgeting and forecasting
- ✓ Governance, tagging and chargeback

Smart EBS

AI assisted querying for your Oracle EBS environment.

- ✓ Natural language to SQL
- ✓ Faster insights across EBS data
- ✓ Secure, accurate, and easy to use for business users and analysts

DocuSense AI

Document management layer for Oracle applications built on Oracle Database.

- ✓ Centralized document repository
- ✓ Intelligent indexing and search
- ✓ Secure, compliant, and fully integrated with Oracle

RESPONZA / SOD

Segregation of Duties for Oracle Fusion Financials and EBS.

- ✓ Pre-built role matrices
- ✓ Automated SOD risk detection
- ✓ Continuous monitoring and certification

Two accelerators map directly to the stories in this briefing. **Smart EBS** supports customers navigating the EBS 12.2 technology shift, and **RESPONZA/SOD** strengthens controls as organizations modernize their Fusion and EBS environments.

Smart EBS

Smarter insights for the EBS 12.2 technology shift

RESPONZA / SOD

Stronger controls for secure modernization

Faster Time to Value

Accelerators reduce implementation time and drive quicker outcomes.

Lower Risk

Proven IP with built-in best practices and governance.

Better Outcomes

Optimized performance, cost, security and compliance.

Long-Term Value

Continuously enhanced IP to support your evolving business needs.

05 OUR APPROACH

Proven Methodology. Predictable Results.

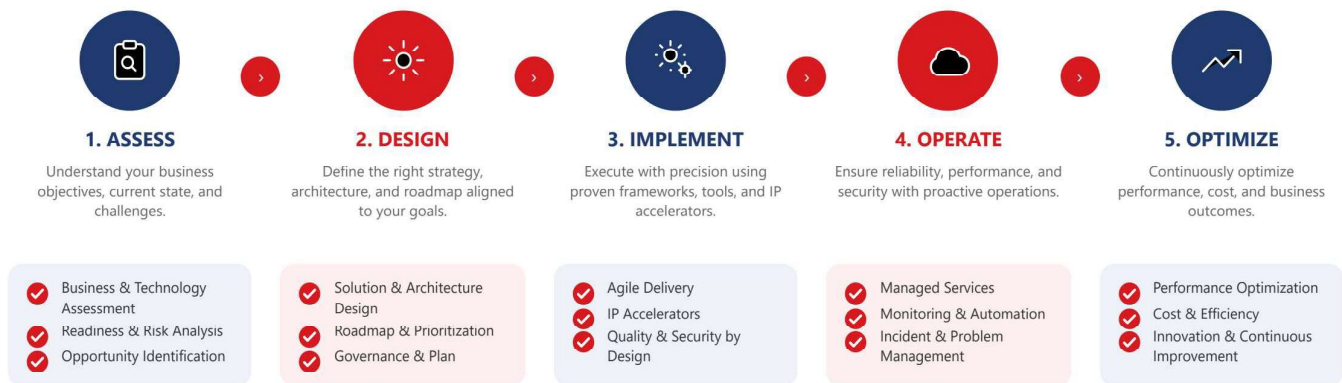

Our engagement model combines deep Oracle expertise, proprietary IP, and a customer-first mindset to deliver measurable outcomes, faster.

OUR PROMISE

We align people, process, and technology to accelerate your transformation and drive lasting business value.

OUR ENGAGEMENT MODEL

CLIENT VALUE DELIVERED

CLIENT SUCCESS STORIES

LET'S BUILD WHAT'S NEXT. TOGETHER.

Whether you are modernizing Oracle EBS, moving to the cloud, adopting AI, or transforming finance with EPM, Doyensys is your trusted partner for the journey ahead.

06 CLIENT IMPACT

Real Outcomes. Measurable Business Value.

We partner with organizations to solve complex problems, modernize platforms, and unlock the full value of their Oracle investments. Here's how we're driving impact across key use cases.

OUR IMPACT

Measurable outcomes delivered through proven expertise, innovative solutions, and unwavering commitment.

CLIENT SUCCESS STORIES BY USE CASE

Mid-Market Healthcare Provider Use Case: Cloud Migration ✓ Successfully migrated to Oracle DBCS Enterprise Edition on OCI. ✓ Enhanced security, scalability, and performance. ✓ Optimized costs through right sizing and monitoring.	100% Migration Success	35% Infrastructure Cost Savings	Stronger Security & Compliance Posture
National Floral & Gifting Retailer Use Case: Cloud Modernization (Azure) ✓ Successfully migrated the entire Oracle database environment from on-premise to Azure in less than 3 months with zero data loss. ✓ Modernized workloads for better performance and scalability. ✓ Implemented monitoring and cost optimization practices.	50% Faster Deployment Cycles	25% Performance Improvement	Automated the migration operations
Global Pet Care Brand Use Case: Cloud Stability and Optimization in OCI ✓ Delivered cloud stabilization and handled cloud security and cost optimization of their Oracle EBS environment in OCI. ✓ Reduced manual effort and improved system stability.	60% Reduction in Production Issues	40% Faster Release Frequency	Higher Team Productivity & Satisfaction
Global Engineering & Construction Firm Use Case: Database Support & Monitoring ✓ Stabilized SQL Server environment with proactive monitoring and expert database support. ✓ Delivered performance tuning and health checks. ✓ Power BI dashboards enabled real-time visibility.	73% Improvement in Issue Resolution	99.9% Environment Availability	20+ Power BI Reports Delivered
Global Beauty & Cosmetics Brand Use Case: Multi Database Support & Optimization ✓ Ensured secure, scalable and high-availability SQL Server to support global business. ✓ Optimized application performance and reduced downtime. ✓ Provided end-to-end functional and technical support.	40% Reduction in Incidents	30% Faster Ticket Resolution	Improved Operational Efficiency
