"Strategies to control TCO in Cloud"

Transforming Your Cloud Journey into a Strategic Asset

In the rapidly evolving business world, the journey towards cloud efficiency is more critical than ever.

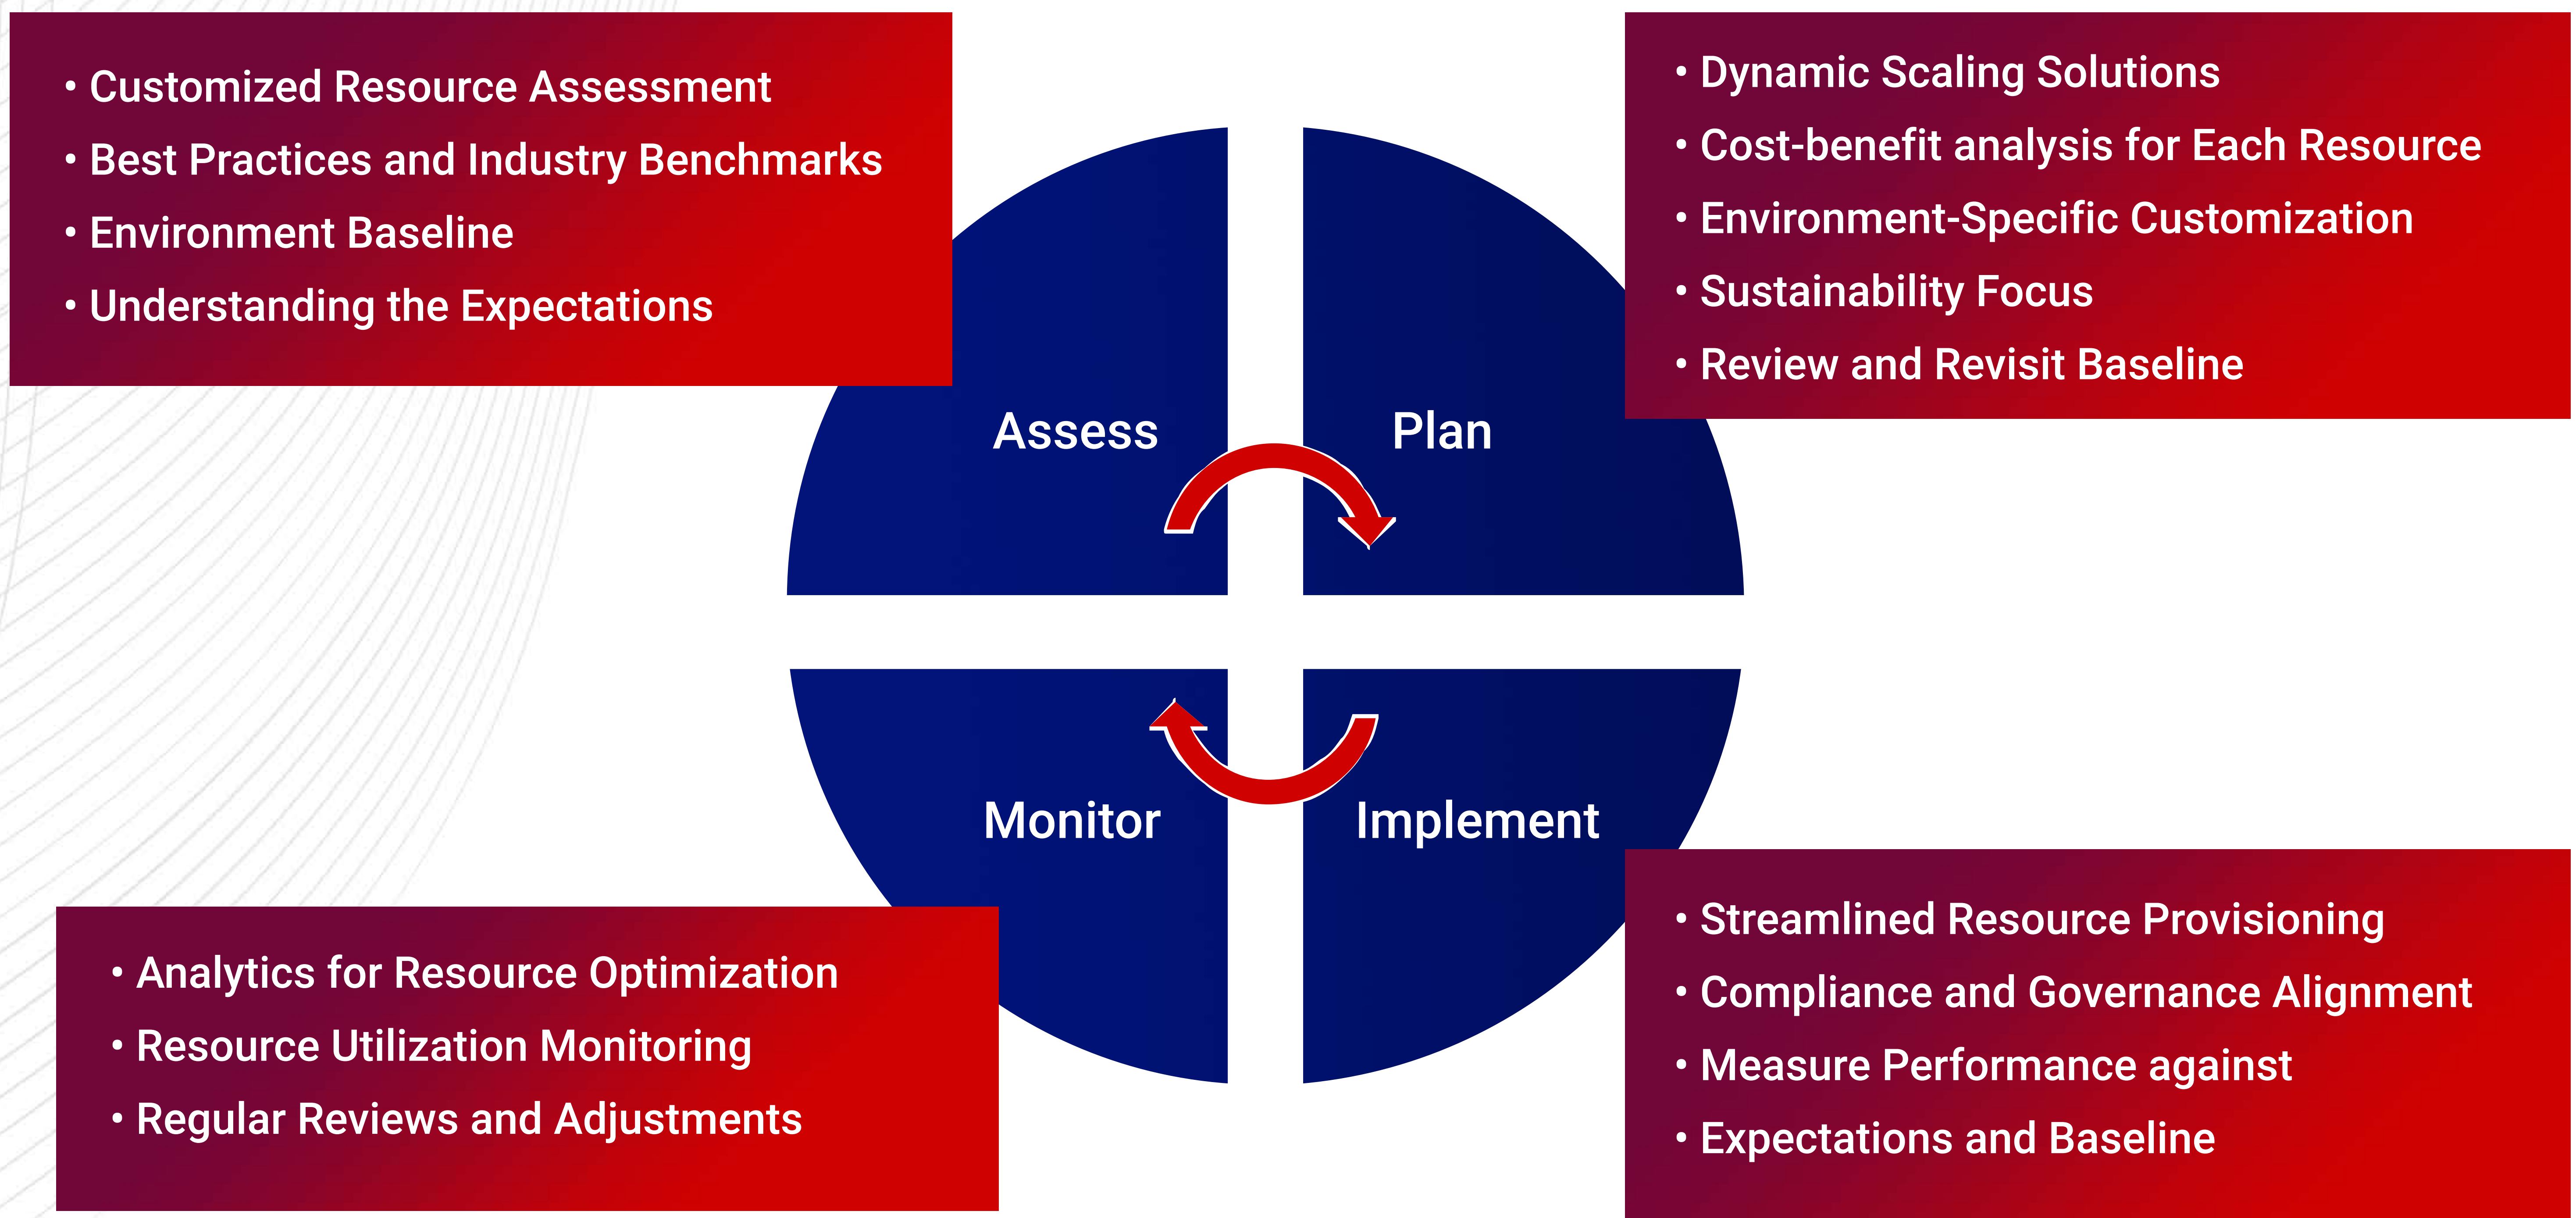

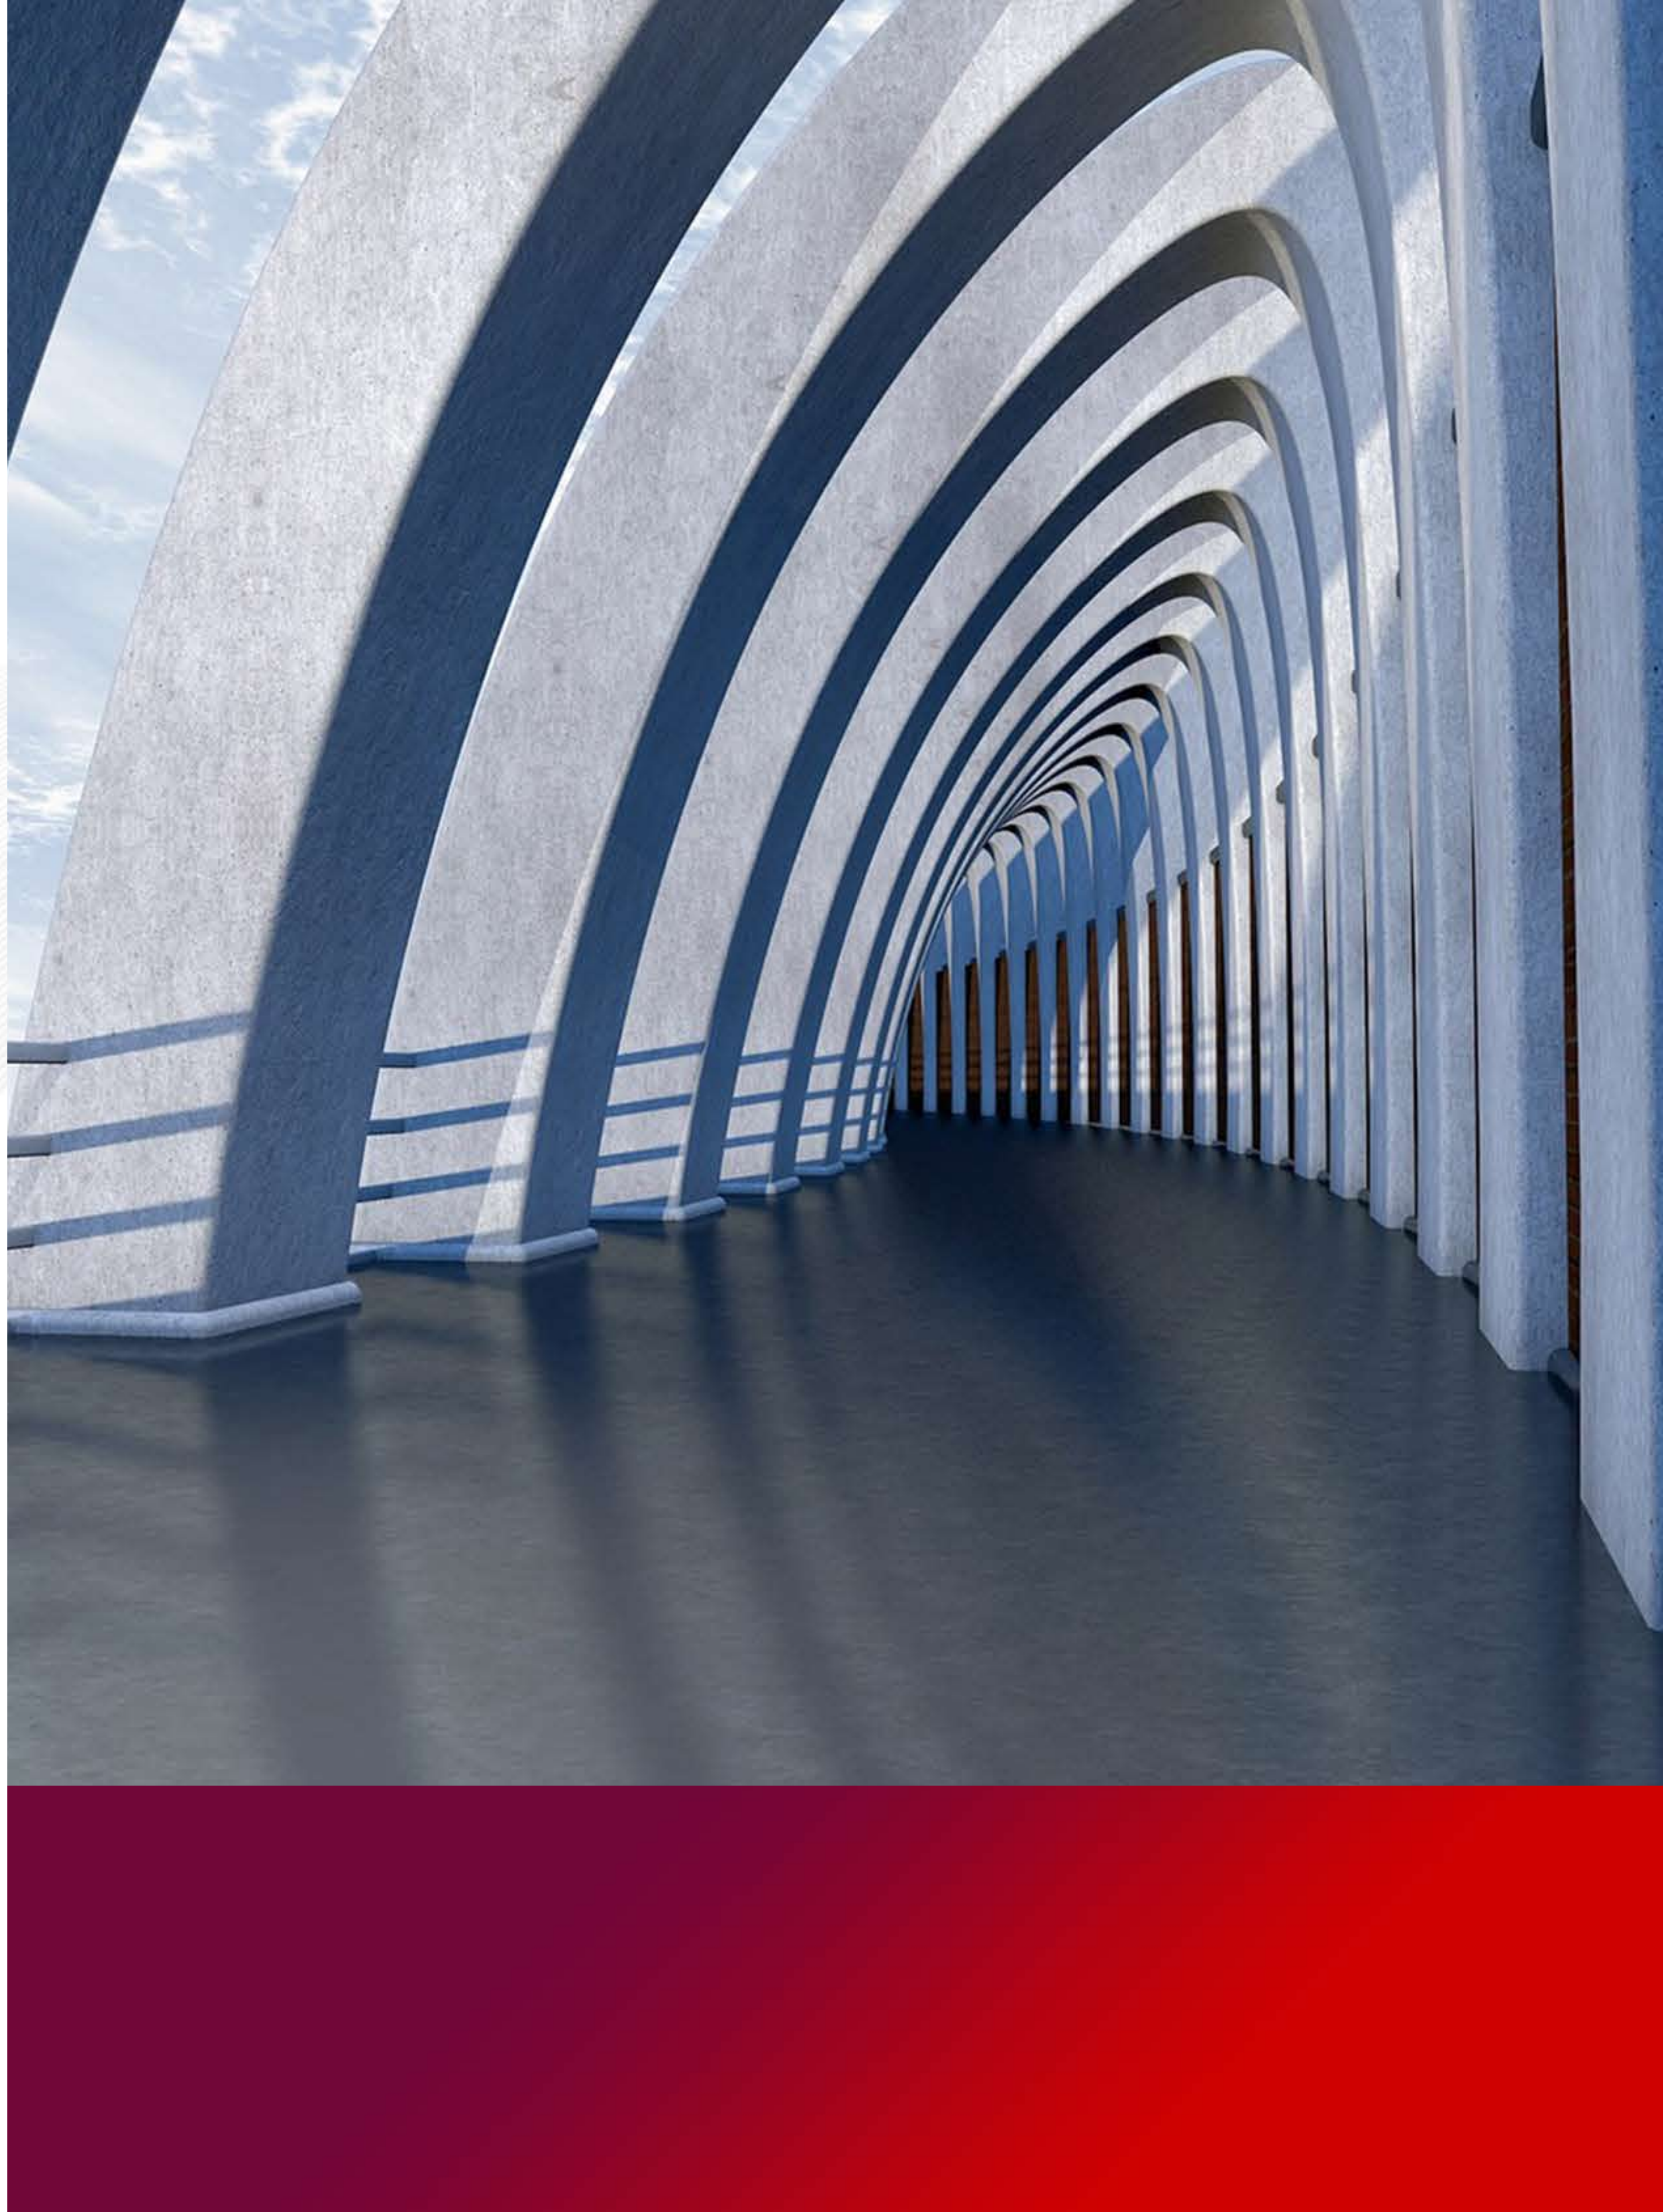

Doyensys leads the way in harnessing the true potential of the Cloud, ensuring that your investment not only saves costs, and eliminates waste but also adds unparalleled value to your operations.

Dive into our strategic approach that goes beyond cost-cutting – it's about unlocking a world of possibilities within the Cloud.

1. Cost-Effective Resource Allocation

Precision in Practice:

Discover our unique methodologies for optimal resource allocation in the Cloud. With Doyensys, ensure you invest precisely where it matters, reducing waste by 40%, long-term savings up to 30-35%, and enhancing efficiency.

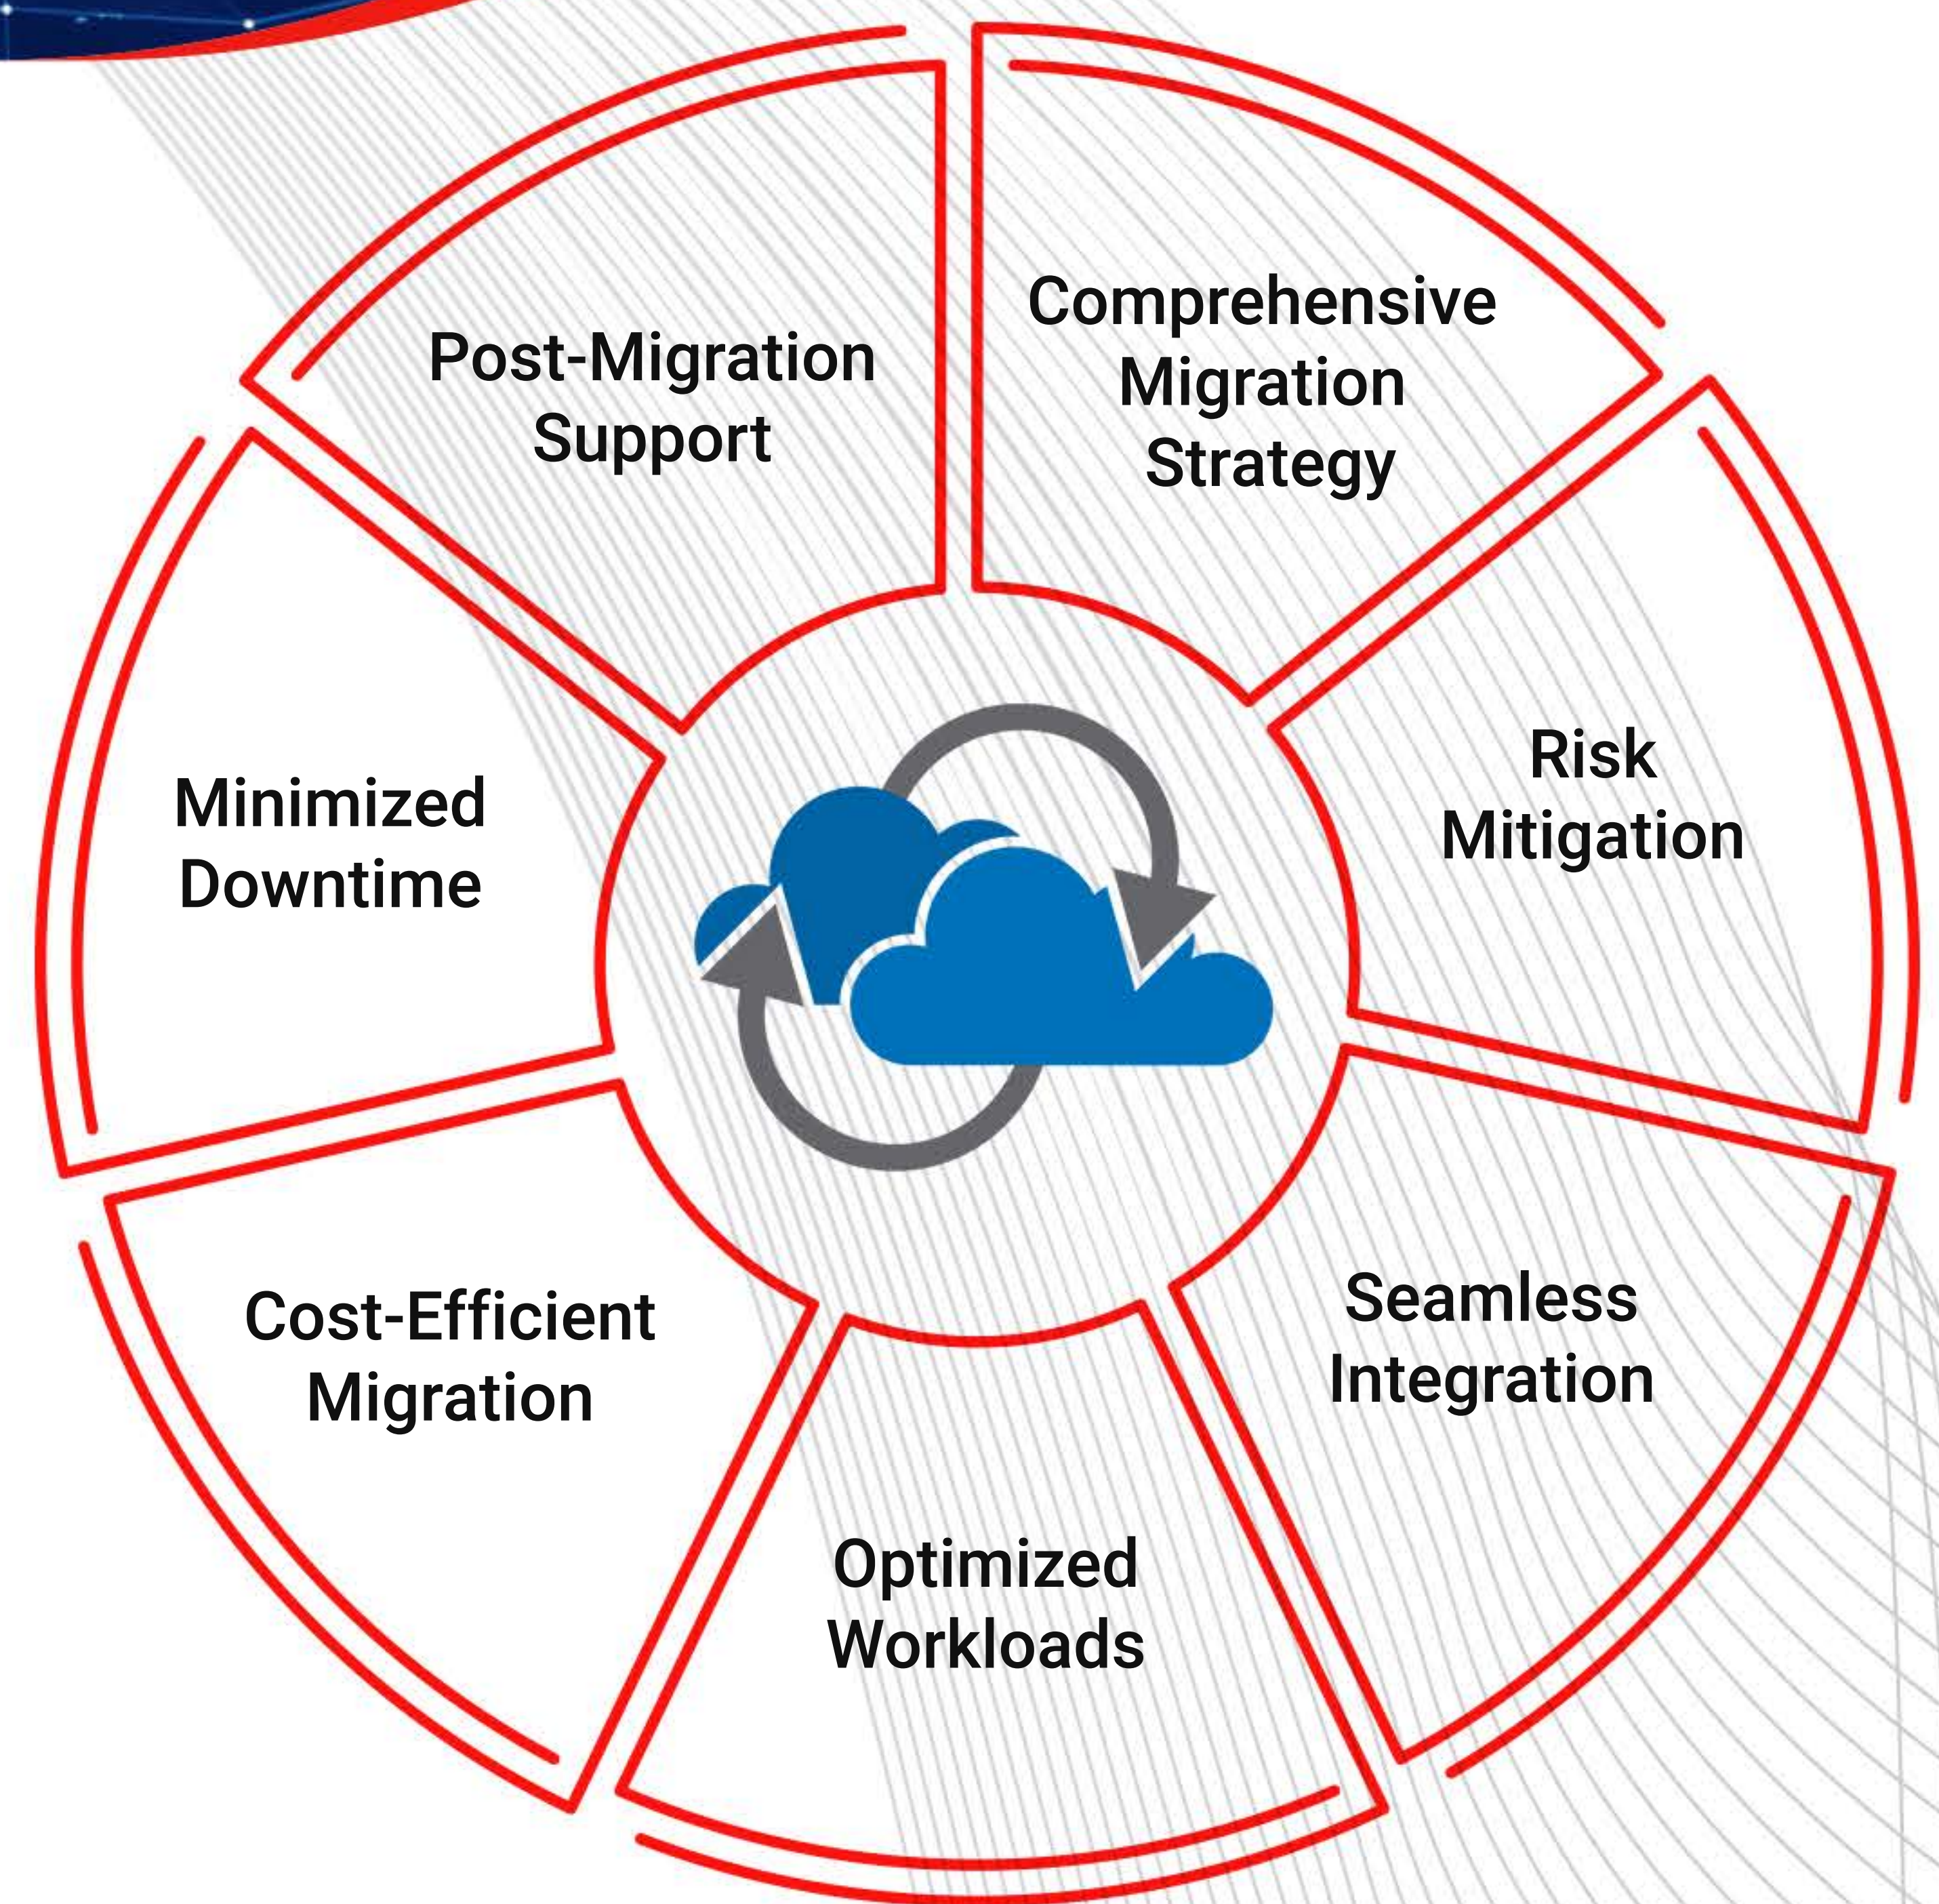

2. Strategic Cloud Migration

Seamless Transition, Tangible Savings:

Navigating the complexities of cloud migration with minimal disruption is our forte. Our strategic approach guarantees a smooth transition to the Cloud, coupled with significant cost savings of 25-30%.

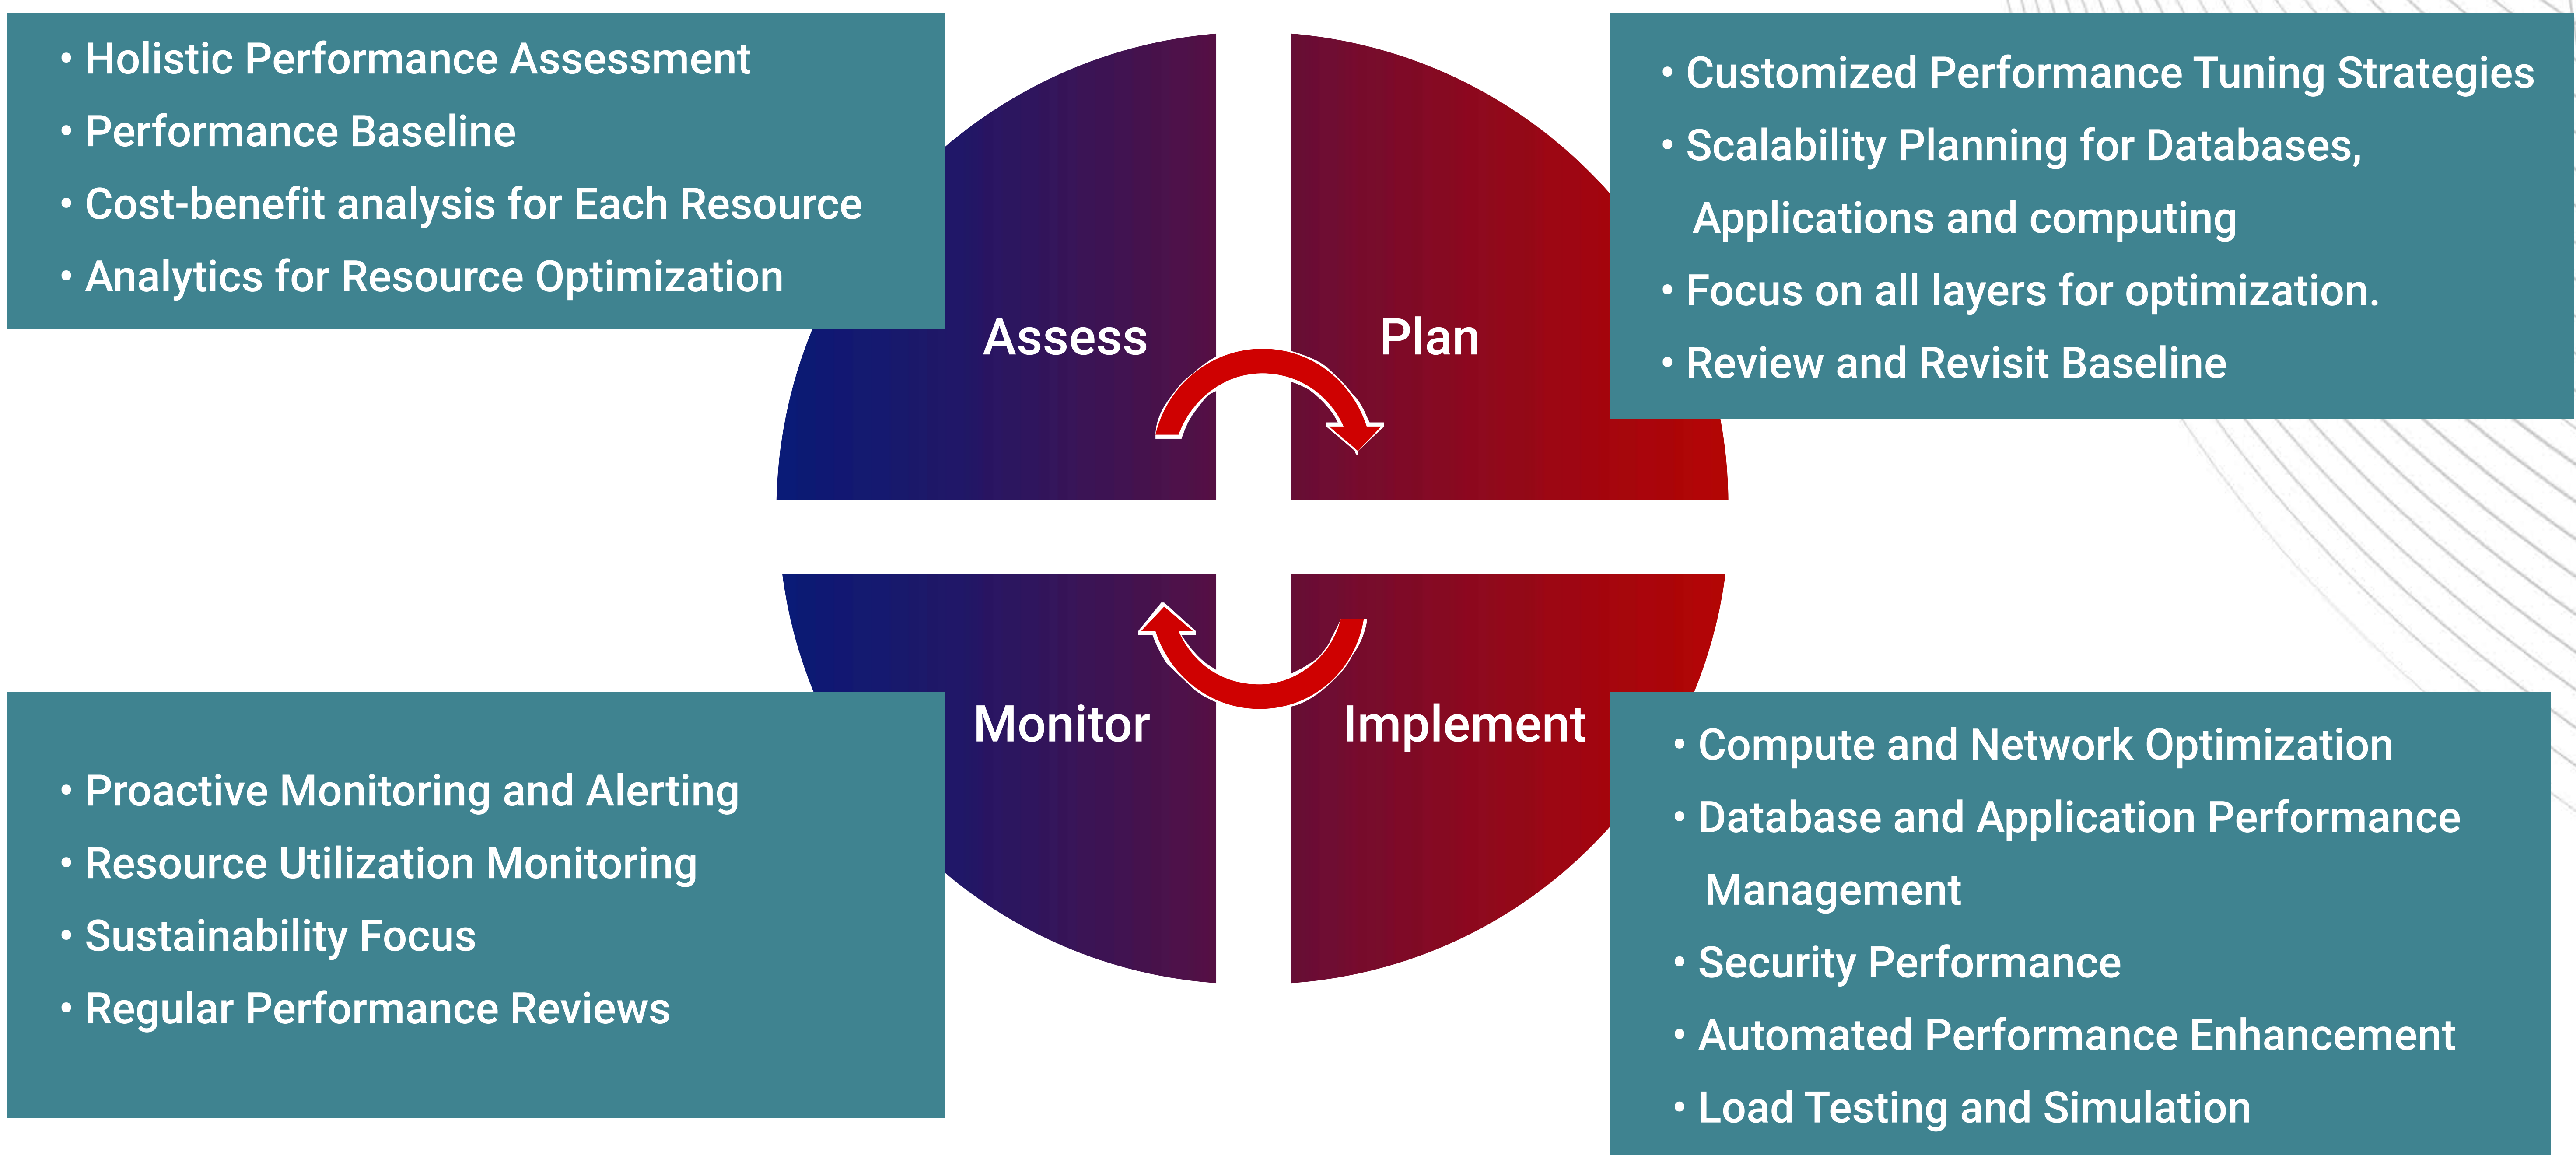

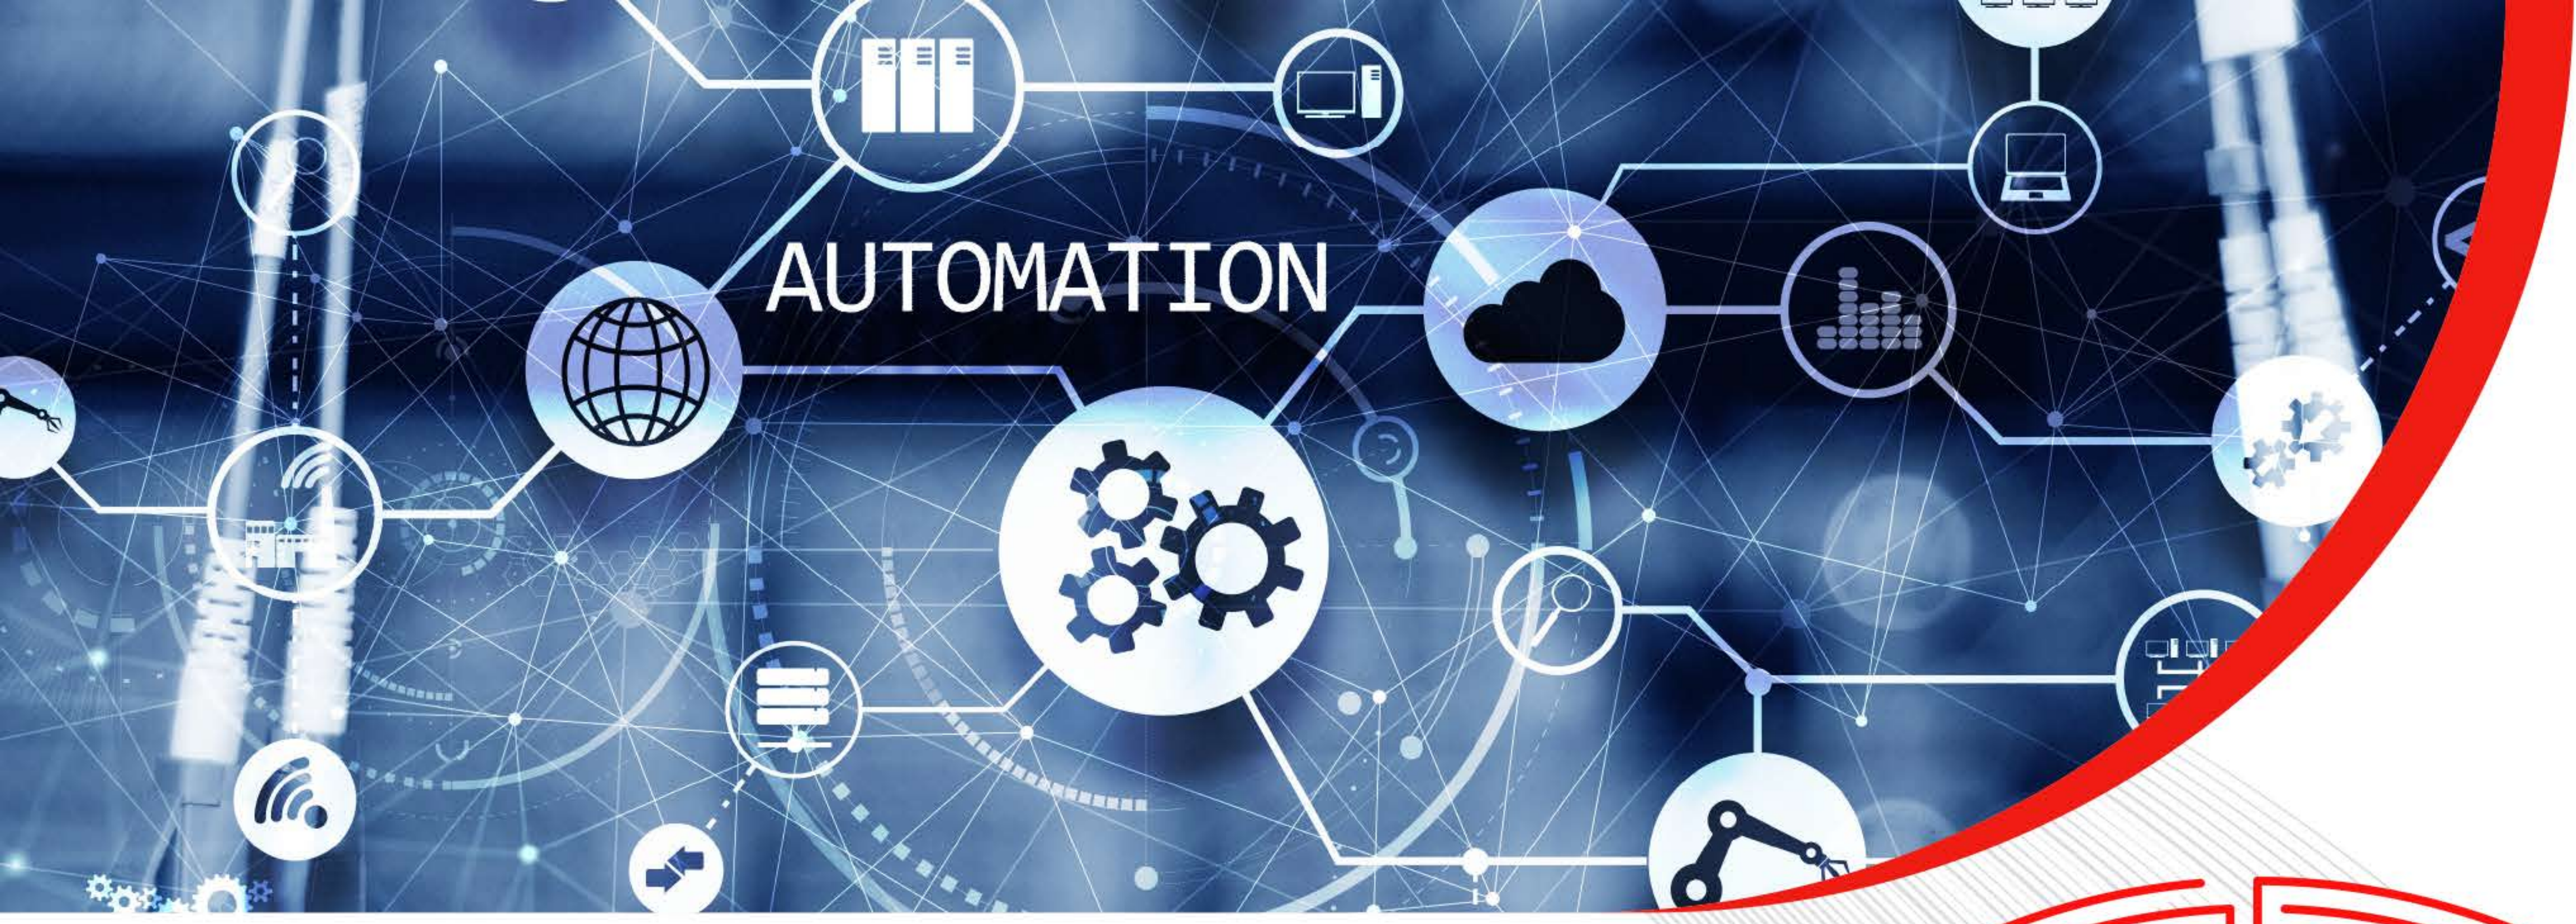

3. Performance Optimization

Unlocking Maximum Potential:

Experience the full strength of the Cloud with our performance-tuning expertise. We streamline your operations, ensuring

a seamless, high-performance cloud environment, achieving 40-45% improvement in performance.

4. Automated Efficiency Gains

Smart Automation, Smarter Operations:

Embrace the future with our advanced automation tools. Reduce manual efforts and operational costs, and step into an era of automated efficiency with Doyensys.

5. Lifecycle Management Best Practices

Holistic Asset Management:

From provisioning to decommissioning, we implement best practices in the lifecycle management of your Cloud assets, ensuring longevity and sustained efficiency. By adhering to best practices throughout the

lifecycle management of your Cloud assets, we have achieved significant cost savings of 30-35% and reduced waste by an impressive 60-70%.

Strategy

- Strategic Planning for Asset Lifecycle
- Capacity Planning and Scaling Strategies
- Cost-Effective Renewal Strategies
- Retirement and Decommissioning Strategies

Adapt

- Automated Provisioning
- Configuration Management
- Patch Management and Updates
- Backup and Disaster Recovery Planning
- Adaptation to Emerging Technologies
- Security Throughout the Lifecycle

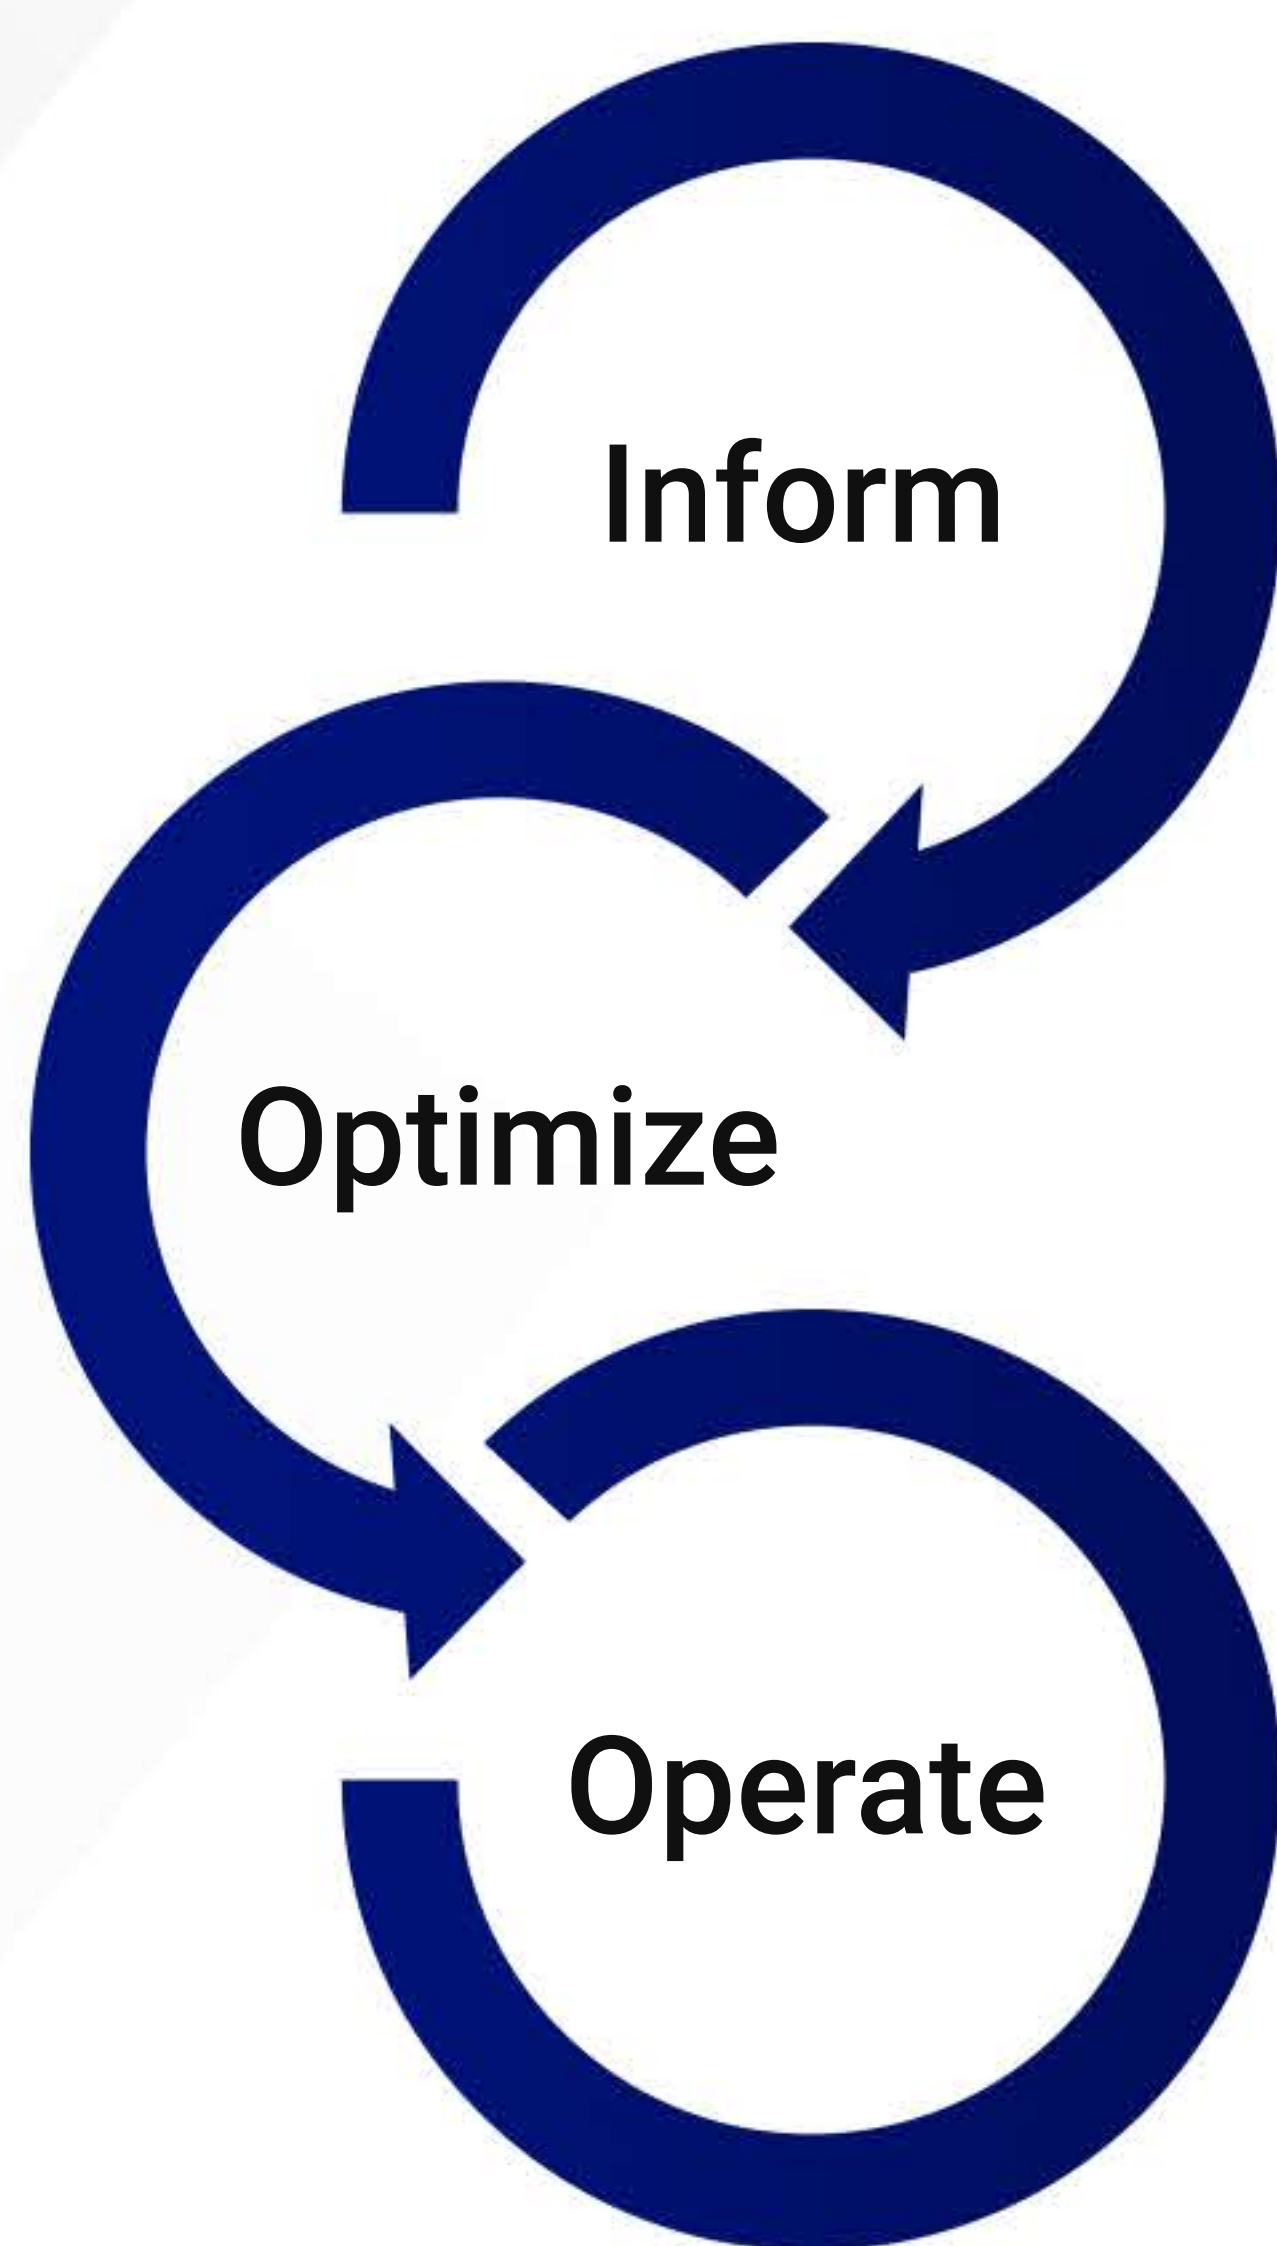

Improve

- Regular Performance Reviews
- Lifecycle Documentation
- User Training and Adoption
- Compliance Audits and Reporting
- Continuous Improvement Practices

6. Continuous Cost Monitoring

Stay Ahead of Costs:

With our robust cost monitoring framework, ensure 100% control over your budget, empowering you to proactively identify and address financial challenges in your Cloud journey. This comprehensive approach not only keeps your budget in check but also contributes to potential savings of 20-30%.

- Showback and Chargeback Models
- Tagging Strategies
- Financial KPIs and Metrics
- Budget Variance Analysis
- FinOps Compliance and Governance

- Rightsizing and Resource Optimization
- Cloud Cost Forecasting
- Continuous Improvement through FinOps Practices
- Benchmarking Against FinOps Maturity Model

- Automated FinOps Processes
- Collaboration Between Finance and Technology Teams
- FinOps Training Workshops

Why Doyensys?

Choose Doyensys for a partnership that goes beyond service delivery.

We bring:

- Expertise in Cloud Solutions
- Proven track record in optimizing TCO.
- Customized strategies aligning with your business goals.
- Commitment to operational excellence and innovation
